This theme offers just two skins: a light, pink-toned one for the city itself and another one for the "Venice Palette" that highlights the orange tones of the buildings around the city. There are a few useful dock icons with this theme, including a houseboat icon that shows your online friend you're on board and another one that lets you manage your calendar. There are a few custom controls available for the theme, including a custom taskbar that uses the bottom area of your screen and brings an interesting sort of photo collage to your taskbar: a Venetian bridge here, a gondola there and a gondolier over there. As always, most of the layout features are simply the customizable colors and the theme's icons that are found in the start menu, taskbar, system tray, etc. Veni Vidi Venice is a small, lovely Win 7 theme dedicated to this town and its beauty. What's New in the Veni Vidi Venice?

Venice is a town and a city in Italy, located on an estuary of the river Adriatic Sea. Venice was once a seafaring trade centre in the Eastern Mediterranean. With the collapse of the Roman Empire in the 5th century, Venice became an island for a thousand years, with the sea as its main source of trade. Venice emerged as an important power in the 13th century, when it defeated its great naval rival Genoa and became the most powerful city in Europe. It established a large commercial empire with its trade routes connecting Europe and Asia. In the 14th century, Venice fell to the Republic of Venice's rival, the Duchy of Milan. For four centuries, the two maritime republics, Milan and Venice, vied for control over the Adriatic. Today, Venice remains a fascinating sight: small canals, tall palaces, bridges and buildings of every age, all interwoven in a setting of calm lagoons and the sea. Venice is a city with 1.75 million residents, 7 million tourists and 12,000 registered cultural properties. Today, only the foundations remain of the City of the Doges, who wielded absolute power over the Republic until the 15th century. The Inquisition was active in Venice between 1571 and 1774. It was involved in the case of Giordano Bruno, who was burned at the stake for heresy. The city's friars, the "Servants of Mary of Modena", were exempt from prosecution and tortured with instruments of the Inquisition in the 17th century, but protected by the royal government. The Venetian Republic was established in 1797 with Napoleon as its first President. After Napoleon's defeat, Venice was annexed by Austria in 1815, and incorporated into the Austrian Littoral. However, in 1866, the Austrian authorities decided to free the Venetian people from Austrian rule and declare the former Venetian territory a free state (as it had been for a millennium). The new state was called the State of Veneto, and the population declared itself independent and the former Venetian territory became part of Italy. Venice is one of the most visited cities in the world, and its airport has the busiest traffic in Italy. The estimated number of tourists is about 11 million each year. Venice is home to about 900,000 people, and the city has a very strong character, influenced by the one thousand-year rule of the doges. Even though Venice is Italy's third largest city, it is still a small town. The mainland's main attraction is Venice. From Milan, it is one hour's drive to reach Venice by car and by train it is 3 hours, and can be done by boat, or by flying to Milan, and going to Venice by boat. As with all Italy's historical sites, it'
